OMBRUK AV BYGGEVARER – ET BRUKERPERSPEKTIV

17.12.2020

SINTEF, INN, Futurebuilt, Boligbygg, Resirqel, IVL, BUILD

Ombruksstrategier – et brukerperspektiv

09:00 Velkommen

Selamawit Mamo Fufa, Forsker, SINTEF Community

09:15 Dokumentasjon av ombruksprodukter

Thale Sofie Plessner, Seniorforsker, SINTEF Community

09:35 Livsløpsmetodikk for evaluering av ombruksstrategier og løsninger

Camilla Ernst Andersen, PhD candidate, BUILD

Sebastian Welling, Project manager at IVL

10:00 Praktisk kunnskap og erfaringer fra pilotprosjekter

Erlend Seilskjær, Fagrådgiver, Futurebuilt

10:15 Brukerperspektiver

- Resultater fra nasjonal undersøkelse

Marin Kristine Henriksen, Stipendiat, INN

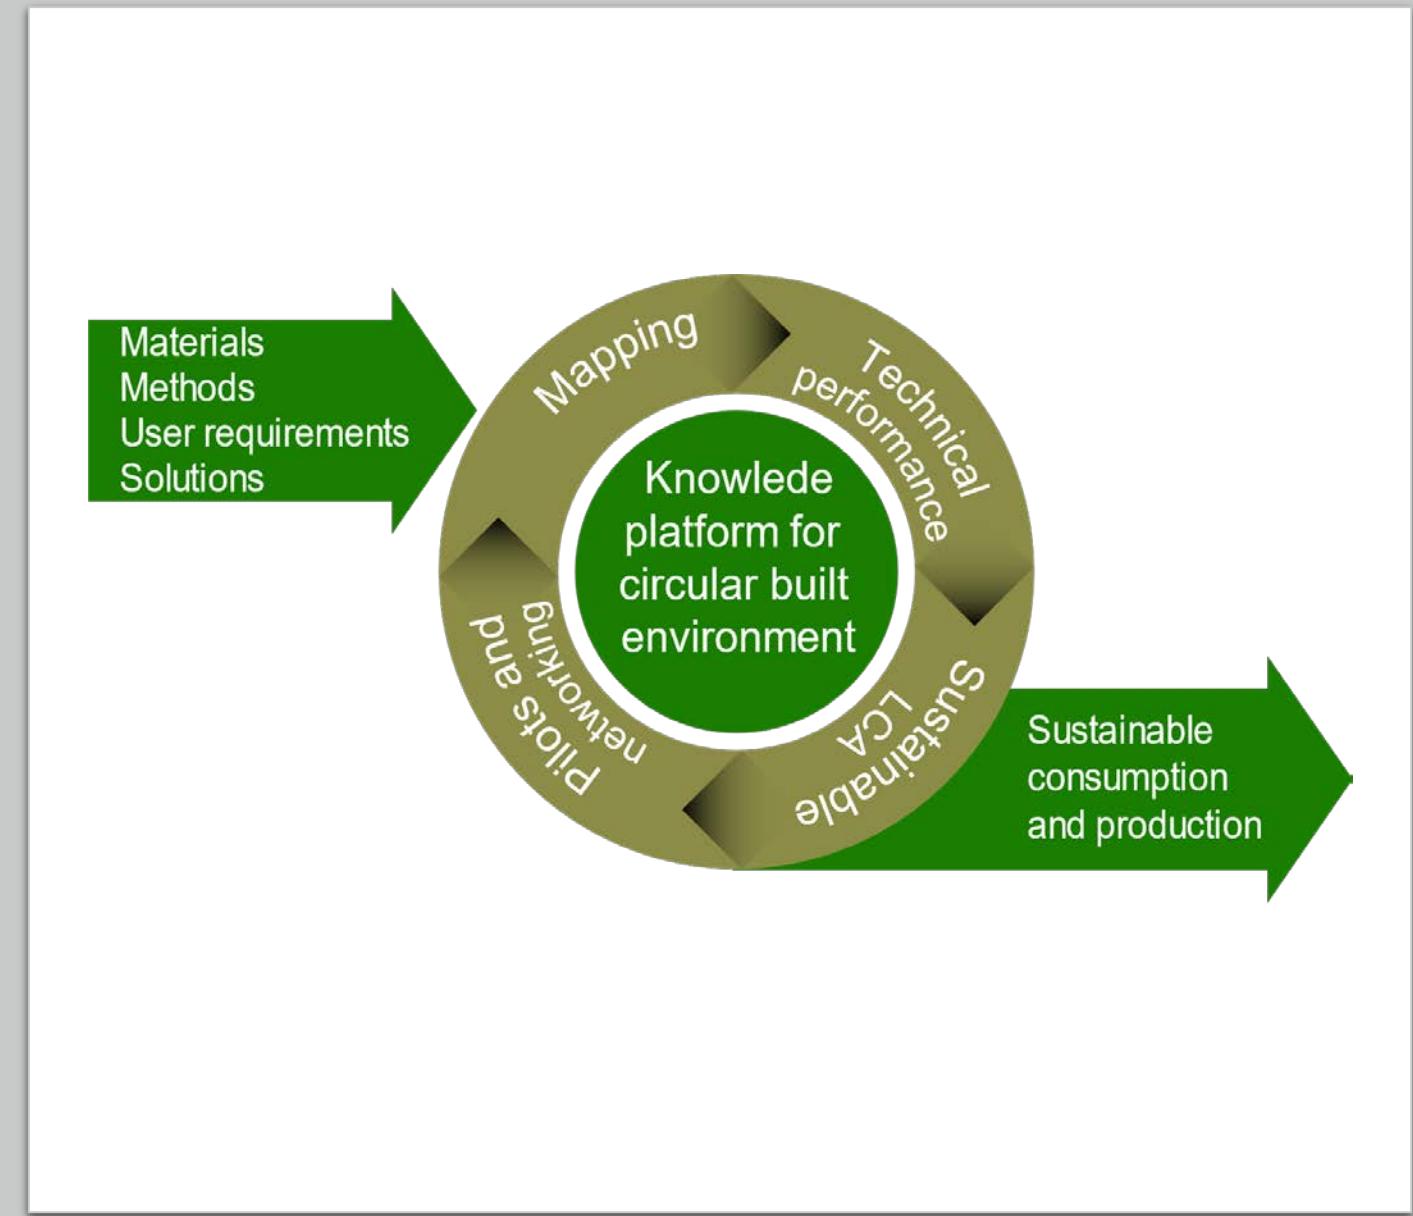

- Nettverksstrategier for implementering av ombruksstrategier

Åshild Lappegård Hauge, Førsteamanuensis, INN

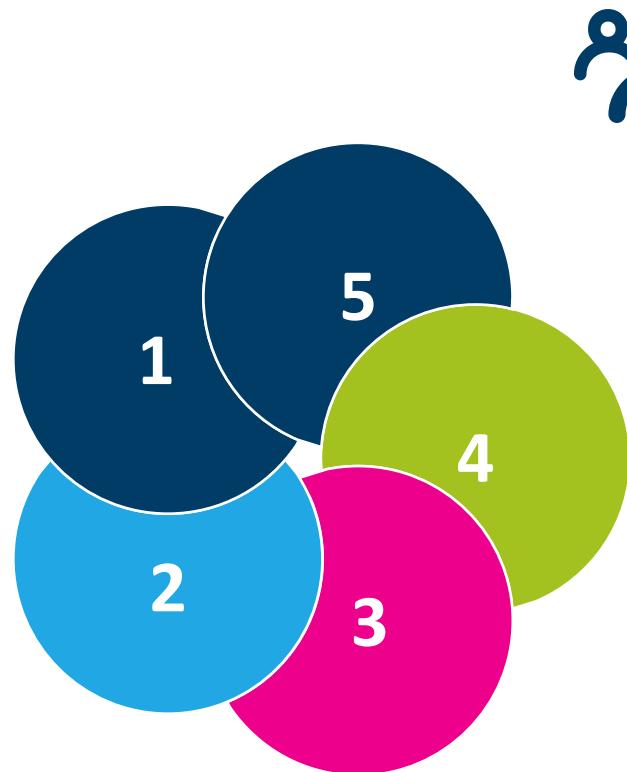

11:00 Avslutning

REBUS - REuse of Building materials - a USer perspective

Goal: To develop knowledge that will enable wider and more efficient implementation of reusable construction products

REBUS - REuse of Building materials - a USer perspective

User requirements

What underlying factors, challenges and opportunities drive different stakeholders to reuse construction products?

Testing and documentation

How can existing methods be further developed to evaluate the technical performance of reuse solutions?

Life cycle Sustainability assessment

How can a novel evaluation method be developed to assess the sustainability of different reuse strategies and solutions?

Practical knowledge

How can new knowledge and solutions for reuse be tested for efficient implementation in practice in the Norwegian construction industry?

Network strategies

How can changes in strategies affect users' attitudes and behavior that lead to a more sustainable consumption?

REBUS - Reuse of Building materials - a USer perspective

Despite a rapidly increasing body of research dealing with barriers and opportunities of the circular economy transition in various industries, there is still limited detailed insights to many of the critical transition aspects in current literature. Previous scientific work
