

# DESIGN and GET INVOLVED in H2020 Biofuels Proposals

Oslo 21 August 2019

**START building your consortium with excellent partners  
in the field of biofuels NOW.**

A dedicated **workshop/brokerage event on project generation** in the field of **biofuels** will be **organized** by the Research Council of Norway, the Norwegian EU-network on bioenergy (NorEUenergy) with the Bio4Fuels FME Centre.

## WHY

The aim of this event is to kickstart and develop projects responding to the biofuels calls for proposals in EU's framework programme **Horizon 2020** with deadlines in **2020**. The event will bring representatives from the **industry, the scientific community and the public sector** together, as a multi sector approach is needed to respond to the challenges ahead in this field. It will provide a unique opportunity to establish new partnerships and develop projects ideas beyond the ongoing activities in the Centre for Environment-friendly Energy Research (FME), Bio4Fuels.

## WHO

This event targets national and international partners in the Bio4Fuels community, with complementary competence and skills and therefore with different potential for tasks and project roles in a consortium. Additional partners beyond the Bio4Fuels community needed for the establishment of consortia will be identified within the European bioenergy organizations:

- European Energy Research Alliance (EERA) JP Bioenergy
- European Technology and Innovation Platform (ETIP) Bioenergy

## WHAT & HOW

The workshop/brokerage event is planned as a full-day event, focusing on relevant biofuels topics. Detailed information of the calls is available [here](#).

After an initial presentation of the relevant calls and pitch presentations of project ideas, there will be parallel working group sessions focusing on concrete calls and finding the best ways to respond to the challenges they address. The groups will be assisted by experts in the Research Council of Norway and SINTEF to support and advice during the discussions.

In order to make the workshop efficient, structured and successful, the participants will be invited to provide an outline of their project ideas/expertise and/or challenges prior to the event.

## WHERE & WHEN

The event will be held in Oslo on the 21 August at the premises of the Research Council of Norway (Drammensveien 288). The deadline for registration is the 7 August and deadline for submission of project ideas/expertise is the 5 July.

## REGISTRATION

The event is free of charge, registration mandatory!

[Online registration on this page.](#)

- Per Arne Karlsen, [pak@forskningsradet.no](mailto:pak@forskningsradet.no)

## PROGRAMME

- 09:30 Registration and welcome coffee/tea
- 10:00 Introduction: setting the scene
- 10.15 Presentation of relevant H2020 bioenergy topics
- 10:40 Coffee/Tea
- 11:00 Pitching of project ideas
- 11:45 Working groups session 1
- 12:45 Lunch
- 13:45 Working Groups session 2
- 14:45 Summary and next steps
- 14:55 Closing

### Organizers:
