

# Accelerating deployment of CCS in Europe

The H2020 project GATEWAY aims at developing a pilot case for cross-border transport infrastructure connecting major European CO<sub>2</sub> sources and sinks to become a PCI candidate in 2017.

Following the high level European Parliament hearing on CCS, Thursday Nov 12th, we are pleased to invite you to the official kick-off of the GATEWAY project!

In the kick-off we will present the framework for the project and initiate the involvement of key stakeholders. This is a critical moment for the project being an enabler for accelerating CCS in Europe.

We kindly ask you, as an important stakeholder, to take part in shaping the GATEWAY pilot case development, so that it will reach the goals of accelerating CCS in Europe.

**Thursday 12<sup>th</sup> November 2015, 14:00 - 16:00**

*Leopold Hotel Brussels EU, meeting room "France"*
